

Cost-Offset Analysis

The Purpose

Cost offset analyses (COA) helps stakeholders understand the cost of treatment and cost difference between client intervention and other standard-of-care interventions.

About the Client

 **INDUSTRY**
Mid-size Pharma

 **LOCATION**
US

 **THERAPEUTIC AREA(S)**
Neuropsychiatry
Nephrology

Client Requirement

To estimate and compare the total costs of client intervention to other off-label interventions from a payer's perspective in various settings.

The Anlitiks Approach

Anlitiks' Contribution

- Anlitiks developed interactive versions of cost offset models for both various perspectives that highlighted cost-savings with the introduction of a novel therapy.
